SUMMARY

I am a junior web developer with expertise in developing single-page web applications using React, as well as ensuring they are responsive and visually appealing through the use of styled components. I have a comprehensive understanding of JavaScript, HTML, and CSS and am passionate about applying my knowledge to create high-quality web experiences.

KEY SKILLS

HTML & CSS

Nodejs

Javascript

React Js

Git & GitHub.

TECHNICAL SKILLS

- Proficient in HTML, CSS, and JavaScript.

- Basic knowledge of Bootstrap 5.

- Strong understanding of React and its principles.

- Good knowledge of React Routers, Redux, and other libraries.

- Familiarity with front-end development tools such as Git, Webpack, Babel, and NPM.

- Familiarity with back-end development concepts and technologies such as Node.js, Express, and RESTful APIs.

COURSE

Frontend Developer

I recently completed a Frontend web development course at WelTec Institute, where I gained a solid foundation in web development by learning both basic and advanced concepts.

PROJECTS

Olx-Clone

This is a full-stack app. It has main features of olx web app, such as searching products, uploading products for sell, search by category of items. Protected routes with JWT validation. Data gets uploaded to mongo Db database.

Shopping Cart App

I have experience building a shopping cart demo for an e-commerce website using React. The cart allows users to add products and adjust quantities, with Redux used for state management. React Router is used to create separate routes for the home page and cart, providing seamless navigation.
